TECHNICAL SKILLS

HTML, CSS, SASS, JavaScript, React.js, Redux.js, GitHub.

PROJECTS

GitHub Fetcher

- GitHub fetcher is user friendly react app which uses GitHub API to get the details of user such as his current repositories, bio, number of followers and so on.
- React-router is used to switch between the pages.
- Built using HTML, CSS, React.js.

React MovieDB

- React MovieDB uses an external API to fetch the details of the movie or the web series like movie rating, release date, casting of the film and so on.
- Redux.js was used for the state management as this app involves deeply nested components.
- React-router is used to switch between the pages.
- Built using HTML, CSS, React.js, Redux.js.

Weather app

- Weather app uses external API to fetch the details of the user defined location and provides the details such as temperature in celcius, current date and weather conditions.
- Weather app is a single page application.
- Built using HTML, CSS, React.js.

House booking landing page

- This website is user friendly and very intuitive to go through. It is a fake house booking website which was built using modern CSS technologies using a pre-processor.
- Built using HTML, SCSS (FLEXBOX, CSS GRIDS).

Student information system (SIS)

- SIS is designed to help manage the daily college activities of recording and maintain by automating it.
- SIS is equipped with a robust set of features like attendance tracking, internal exams records etc.
- This app saves a lot of time and helps the management work accurately.
- I was responsible for designing and building the UI of this application.

EDUCATION

- **B-Tech** in Information Technology, **MIZORAM UNIVERSITY**, Aizawl
  August 2018.   **CGPA: 7.35/10.00**
